Using Embryo Adoption

EMBRYO ADOPTION
AWARENESS CENTER

Did You Know?

There are more than **600,000** frozen embryos in storage in the United States.

Are you overwhelmed by having to decide what to do with your remaining embryos?

F.A.Q.

How will you benefit from knowing that embryo donation is a viable option?

With embryo donation, when you have completed your family through IVF, you can *choose* the next family for your embryos. Donation for reproduction gives your embryos the opportunity to live the full life you created them for.

THE HAWKINS FAMILY
gave birth to their adopted
daughter, Annika, in
2009, thanks to remaining
embryos donated by the
Yasuda family.

"Everybody is where they
are supposed to be."

ARE YOU STRUGGLING WITH INFERTILITY?

.....

Embryo adoption may be the option you've never heard about and the hope you need.

MALE INFERTILITY

Did You Know?

Cryopreserved embryos have no definitive storage life.

Children are regularly born from embryos that have been frozen for more than 10 years.

F.A.Q.

What is the difference between embryo donation and embryo adoption?

Embryo adoption applies the adoption model to the process of embryo donation, allowing families to be involved in the matching process and providing assistance similar to what's available with an adoption.

When using embryo donation through a clinic, the genetic parents simply donate their remaining embryos anonymously and will not know who received their embryos, nor if there were genetic siblings born to another family.

THE TRABUN FAMILY
gave birth to three children,
thanks to remaining
embryos donated by the
Smith family.

"Another family's story
is connected to our own."

F.A.Q.

Is embryo adoption less expensive than IVF?

At an average cost of about \$15,000, embryo adoption is often less expensive than IVF, especially if donor eggs are required. In addition, embryo adoption agencies have embryos available. Clinic donation programs frequently have patients on waiting lists for embryos.

THE CANNON FAMILY
gave birth to their adopted
son, Corinth, thanks to
remaining embryos donated
by the Fletcher family.

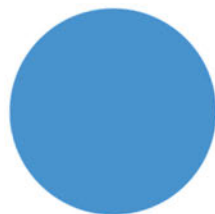

"These remaining embryos are lives
that need a chance to be loved."

FERTILITY PRESERVATION

HELPING OUR TROOPS

.....

The Secretary of Defense recently announced the intention to help our military personnel with fertility concerns. While cryopreservation of gametes is one solution, the use of donated embryos is another path to pregnancy and childbirth that has been proven successful.

Did You Know?

The law indicates that the donation of embryos is an exchange of property. However, the end result is the birth of a child not genetically related to the patient.

Because the placement of a child into a non-genetic family is called adoption, we encourage the use of the term "embryo adoption" and provide social and emotional support to all parties involved.

F.A.Q.

Why should I choose embryo adoption over a clinic embryo donation program?

If you have remaining embryos, you are able to choose the family for your embryos. Clinic donation is anonymous.

Embryo adoption programs have donor families waiting for adopters. If you are wanting to receive embryos, you may get matched more quickly, more economically, and achieve pregnancy faster.

MEET THE STREGE FAMILY, the pioneers of embryo adoption. Their daughter, Hannah, was the first embryo adopted baby. She was born in December 1998. "We were the first family to use this model of adopting embryos. It's been a completely positive experience."

"It's been a
completely positive
experience"

CANCER-RELATED INFERTILITY

.....
Embryo adoption is a
viable and successful
option for cancer survivors
who are still able to carry
a pregnancy to term.
